religions and psychological theories, to great literary works and volumes on the subject of astrology.

Through their experience in conducting personal astrology readings, the Bisbos observed that most people have questions about their careers and relationships, such as whether they should change jobs or when they will find their soul mates.

Henrik notes, "It is important to interpret a person's birth chart in the context of his life to provide an accurate reading. As astrology is such a vast study, you need to establish a framework to read a birth chart, which is essentially a 'snapshot of the sky' when you were born, generated based on your date, time and place of birth."

He reasons, "The prime minister and a hawkler could be born at the same time with the same birth charts, and be subject to the same celestial influences. However, their lives are worlds apart. This is why I request for personal details about your life prior to a consultation, so that I can interpret your chart in a way that is relevant to your needs."

While the Bisbos specialise in personal astrology, they also conduct astrological readings for businesses. Similar information is required such as the time, date and place where the company was founded, to explore the optimum season for making major changes in the company, or determine if certain staff members are aligned with the company's chart.

With the stars aligned for Bisbo Astrology, the couple hopes to share their passion, knowledge and expertise for the subject with fellow Cove residents, through courses and consultations.
